Dense networks and loads of relationships were considered as competitive advantage and departments introduced extra budgets to invest in the relationships with any buyer or supplier to increase the social capital between those companies to the maximum, assuming a linear relationship between social capital and performance. However, the emphasis put on the bright side made companies blind for the negative effects of social capital and the fact that the relationship not can be understood as a linear function. This paper reviews selected pieces of literature on the topic of social capital in order to assess the paradox existing around the concept of social capital by studying how a buyer-supplier relationship can be affected positively as well as negatively by social capital.
