Good News Publishers, United States, 2014. Pamphlet. Book Condition: New. 137 x 89 mm. Language: English . Brand New Book. In 2010 auto manufacturers recalled a staggering 20 million cars in the US for various defects! Surprised? The thought of such a large number of defective cars on the road is startling. And so is the cost of repairing that many vehicles! A recall generally costs the car manufacturer a large amount of money. For example, one worldwide recall involving 8.5 million cars was estimated to have cost 2 billion dollars--\$1.1 billion for the repairs and \$900 million in lost future sales! Obviously, a recall indicates that there s something serious involved. Owners of the recalled car models are alerted to the defect. They are instructed to contact their dealer and make an appointment for their car to be repaired and brought back up to safety standards. The car owners pay nothing for the required replacement parts or for the labor to install them. Thankfully a recall means that whatever is wrong can be made right. The car owners simply need to respond to the recall instructions and the problem will soon be fixed. As the executive director of the Center for Auto Safety instructed the owners of recalled cars, It s a free repair. Get it done. It may save your life. It s disturbing to think of a major recall involving millions of cars. But even more disturbing is the apathy of many car owners. Despite the possible risk to their own lives and the fact that the repairs to their cars would be free, 30 of those 20 million owners in 2010 never responded to the recall. That s six million people! Another recall notice that affects all of us More amazing is that a much higher...
