Not illustrated. 1919 Excerpt: . ft. 10 in. illustrates the change of form accompanying this change of habit. This example is abnormal in point of stoutness, for, to have been normal with this circumference, length of fins and very great weight, the width of head should have exceeded 5 ft. and the length of body should have exceeded 16 ft. The mouth and teeth were also abnormally large for this short length. It is probable that within two weeks this large shark had eaten from my nets more than 50 sharks of about 6 ft. in length, leaving only their heads gilled in the net; and, with at least half a dozen species to select from, it was always her own species which she selected. At the time of her capture she had just eaten four of her species from my net, two of which had been swallowed whole, except the head of 5 ft. examples, and there were four cleanly-cut pieces which represented entire bodies, except heads, of two more 6 ft. hammerhead sharks; then the stomach contained more than a peck of vertebrae of sharks, provisionally identified as her own species. The uteri of this specimen were small, malformed, almost obsolete, and non-functional. From evidence obtained by examination of the uteri of many very old female sharks, I am of the opinion that after they have reached very advanced age, their reproductive organs cease to be functional. Size of young in sharks depends on size of mother. I...
