

Closing the Quality Gap: A Critical Analysis of Quality Improvement Strategies: Volume 7 - Care Coordination: Technical Review Number 9

By U. S. Department of Health and Human Services

Createspace. Paperback. Book Condition: New. This item is printed on demand. Paperback. 214 pages. Dimensions: 11.0in. x 8.5in. x 0.5in. Many organizations and individuals are interested in care coordination, particularly as it relates to concerns about inefficiencies and suboptimal quality in the U. S. health care system. The Institute of Medicine identified care coordination as one of 20 national priorities for action to improve quality along its six dimensions of making care safe, effective, patient centered, timely, efficient, and equitable. The burgeoning number of aging Americans with chronic illnesses and the increasing complexity of care create challenges to coordination experienced at every level the patient, the clinical practice, and the system. Care coordination interventions are particularly attractive in that they have the potential to improve both efficiency and quality. This final Evidence Report in the series Closing the Quality Gap by the Stanford-UCSF Evidence-based Practice Center addresses the topic of care coordination. This report describes our working definition of care coordination, summarizes some of the evidence about the effectiveness of care coordination interventions from systematic reviews, and presents relevant frameworks for the development and evaluation of future interventions. This approach may be useful to system-level policymakers, service-level decisionmakers, and patients. System-level nolicvmakers...

Reviews

I actually started looking over this publication. It really is rally interesting throgh studying period. Once you begin to read the book, it is extremely difficult to leave it before concluding.
