

Corrosion Science and Natural Products Chemistry

By Bothi Raja

LAP LAMBERT Academic Publishing. Paperback. Book Condition: New. Paperback. 260 pages. Dimensions: 8.7in. x 5.9in. x 0.6in. Mild steel (MS) is the material of choice to fabricate various reaction vessels, pipes, tanks etc. , in most of the chemical industries due to its easy availability and low cost. Hydrochloric acid and Sulphuric acid are generally used for the removal of undesirable scale and rust in several industrial processes. MS suffers severe corrosion in aggressive media. Many heterocyclic compounds have been proved to be effective inhibitors for the corrosion of metals and alloys in acid media. There has been a growing trend in the recent years to go in for eco-friendly, non-toxic green inhibitors in place of synthetic substances which suffer from many drawbacks. This book discusses the anticorrosion effect of the following alkaloidal plants viz. , Datura metel, Datura stramonium, Solanum nigrum, Solanum tuberosum, Piper nigrum, Rauvolfia serpentina and Strychnos nux-vomica and their corresponding alkaloid constituents viz. , Atropine, Solasodine, Piperine, Reserpine and Brucine against mild steel corrosion in acid media. Further, this study has unearthed another facet of the alkaloids viz. , the corrosion inhibition potential as so far only their physiological effects are studied. This item ships from multiple...

Reviews

An extremely wonderful book with lucid and perfect information. It is one of the most awesome publication i have read. Your life period will probably be enhance the instant you total looking at this pdf.

-- Prof. Dan Windler MD

It is really an amazing publication i actually have at any time read. It is really simplistic but unexpected situations inside the 50 percent of your pdf. Its been written in an exceptionally simple way in fact it is just right after i finished reading this ebook where actually transformed me, alter the way i really believe.

-- Dr. Celestino Spinka III
